Web Developer with a Business Development Background

- Passionate and focused full stack web developer, experienced in Python and JavaScript, with a background in business development in the IT industry. Eager to put my technical acumen to good use at a company that values teamwork as I continue to grow and fine-tune my skills.

TECHNICAL SKILLS:

Front-End Development:

Languages:

Databases:

Frameworks:

Methodologies:

Development Tools:

Design Skills:

HTML5, CSS3, Bootstrap, jQuery, AJAX, API
JavaScript, Python
MySQL, NoSQL (MongoDB, Mongoose.js) SQLite
Express, Django, Flask,
RESTful, MVC, ORM, OOP, Agile
GitHub, AWS, Heroku, Node.js
Adobe Illustrator, Premier Pro, After Effect

WEB DEVELOPMENT EXPERIENCE & PROJECTS

Travel Buddy (technologies used: Python, Django, SQLite, HTML5, CSS3, Bootstrap):

- Created an app that features Login and Registration with validations, displays the logged user's created travel plans. Also displays other users' travel plans. The travel plans are specific to user. User can join other users' travel plans. Once the user clicks join button, the record moves to the main Travel Schedule table. The data is stored and retrieved from Django's Built-in SQLite Database, which has 3 models (User, Travel, and UserTravel).

Weather Forecast: (technologies used: Angular JS, HTML5, CSS3, Bootstrap, Weather API, Node.js):

- Created an Angular app which presents the user with 6 different views, each different URL/view present the user with a city. Within each of these views, the user can see current weather information. This assignment required an API Key retrieval from <https://openweathermap.org/api>. The weather information is constantly updated.

PROFESSIONAL EXPERIENCE

Harmonia Holdings Group, LLC, Mclean, VA | Sr. Proposal Coordinator | 08/2018 – present
